## Liquip NSW Workshop & Servicing

Enjoy a welcome return to 'good old fashion' workshop service and delivery

Our new workshop and headquarters, housing our highly experienced team of sales, administration and workshop floor staff not only offer and deliver 'good old fashion' Australian service and ingenuity, but also provide a complete range of customisation and repair services for:

- > **Road Tankers and Trucks**
- > **Fuel Terminals and Depots**
- > **Bulk Liquid Storage Tanks**
- > **LPG Tanker Repairs,  
Calibration & Re-horse**

As a proud and key business partner of Liquip's Distributor Network we are an authorised reseller and installer of **Liquip Equipment Parts** and products.

Our dedicated team of qualified engineers, mechanics, boilers makers, electricians and fitters and turners have many years of experience and the know how to assist with customised Road Tanker projects, servicing and maintenance requirements that allows any fleet or single operator to quickly get back on the road.

Now servicing the greater Sydney market we are primed and focused to assist all bulk liquid transfer operators with a wide and extensive range of quality Bulk Liquid Transfer and Storage solutions and are driven to provide a service that meets all expectations.

**CUSTOM PROJECTS**

We're experts in the development, design and execution of high quality custom projects aimed at the safe, efficient and effective transfer of bulk liquids, especially petrochemicals. Many of these projects are usually undertaken at our headquarters, however we can also work on-site when it comes to the establishment or repurposing of Terminals and Depots and Bulk Liquid Storage Facilities.

Our dedicated team have many years of industry experience and the expert know how to supply custom fabricated solutions to what may appear to be at first impossible tasks. Utilising the latest equipment parts and products from Liquip and other suppliers, along with the necessary skilled trades people and engineers, no brief is ever too big or too small for us to deliver on. And for each project we offer a range of support options, including local onsite support to phone based technical assistance should issues or questions arise after completion.

**REPAIR WORK & MAINTENANCE**

Operating and maintaining equipment requires a large investment. We take great pride in our ability to ensure equipment is serviced or repaired to the necessary standards as fast as possible (without compromising on quality) to get customers back operating in the shortest possible time frame. This ensures they can once again start making returns on their investment.

At our headquarters we can repair and carry out maintenance on Tanker Trucks and Prime Movers used for the transfer of fuel derivatives, hazardous liquids and food, as well as stationary storage tank equipment such as pumps, dispensers, fuel management systems and tank gauging systems.

We also have a large range of spare parts on site that can be drawn upon to speed up the repair process.

And if needed work can be completed outside general business hours using our after hours service division, who can work around the clock to complete any repairs and servicing off site at a facility or equipment location.

Our services include the Repair & maintenance of:

- > Prime Movers
- > Liquip Equipment & Components
- > Internal and External Barrel
- > Suspension
- > Road Tankers & Road Tanker Dispensing Systems
- > Meters & Diptronic
- > API and Drybreak Couplings
- > Electronics and Pneumatics
- > Overfill Systems
- > Pumps and Hose Reels (including reconditioning)
- > Bulk Flow Metering Systems (including Calibration & Certification)
- > Bowsers, Dispensers & Fuel Pumps

We also carry out LPG calibration on-site for customers and have mobile calibration facilities.

**WORKSHOP FEATURES & ACCREDITATIONS**

Our workshop holds all the necessary indoor and outdoor space for large Road Tanker and trailer maneuverability and storage. It is also fitted with latest tools and equipment to carry out custom and repair work services. Our extensive stock holdings of popular Liquip Equipment Parts and products (as well as other industry related parts and products) enables work to be carried out in a timely fashion and avoids part ordering delays.

This makes us a very agile operation when it comes to emergency repairs and access to replacement products for implementation or purchase.

Our team of electricians, boilermakers, engineers, CAD designers, fitters and mechanics meet and hold the qualifications and accreditations required to carry out works including:

- > Electrical Engineering (Hazardous Area Electrical work)
- > Auto CAD Engineering of all fit-outs
- > Loading, Discharge & Blending Skids Design & Fabrication
- > Diptronic Road Tanker Systems installation
- > Tanker Upgrades
- > Re-Horse & Refit of Road Tankers
- > Specialised Custom Builds and Fit-outs of Road Tankers
- > Depot and Terminal Equipment & Systems design and construction
- > Self Bunded Storage Tank Pump & Fuel Management supply and installation
- > Tank Gauging Supply and Service
- > Flame Proofing of Prime Movers
- > Loading Arms & Overfill Systems design and construction
- > NMI Calibration for Tankers, LPG and Dispensers or Bowsers
- > Degassing management off site
- > SLP Inspections & Hydro-tests
- > Supply & testing of Fuel Delivery & Vapour Hoses
